The Energy Efficiency Fund plays an exceptionally important role in the sustainable reconstruction of Ukraine by implementing the "Restoration" Program in partnership with the EU.

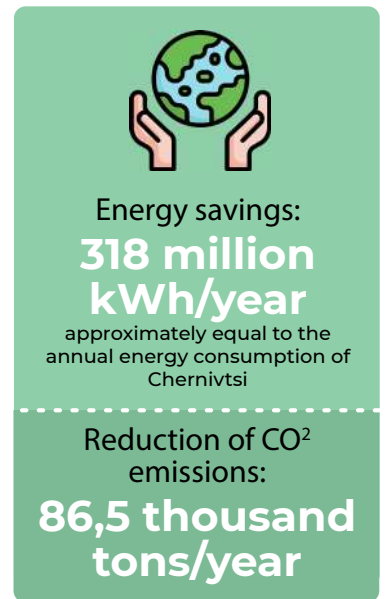

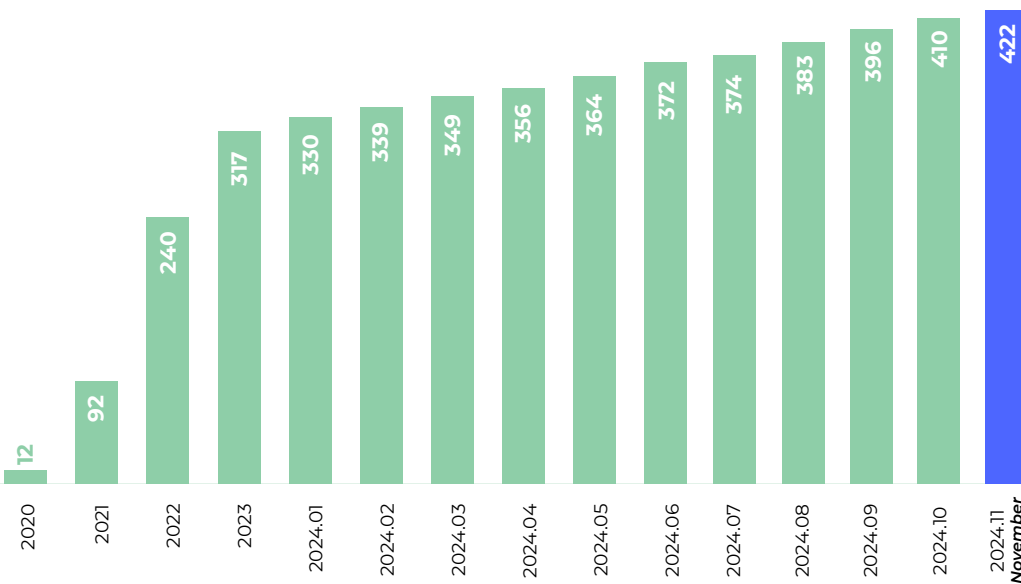

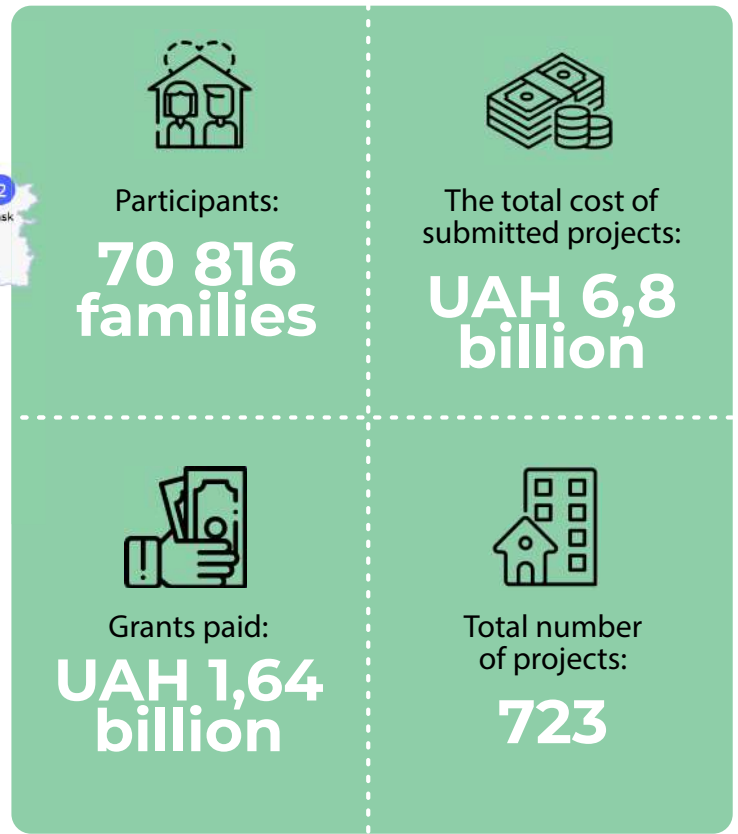

This program enables the restoration of multi-apartment buildings damaged by the full-scale invasion, giving tens of thousands of families the opportunity to return home. Rebuilding the housing stock contributes to job creation, strengthens local communities, and attracts investments in new energy efficiency technologies. This initiative is not only about rebuilding what was destroyed but also about shaping the future – an energy-efficient, modern, and resilient Ukraine. The EU is proud to be a partner in this initiative, which stands as a symbol of the unbreakable spirit of the Ukrainian people.
