The Energy Efficiency Fund has temporarily suspended the acceptance of new applications under the “GreenDIM” Program

The acceptance of new applications for participation in the “GreenDIM” program has been temporarily suspended due to the exhaustion of the allocated resource of UAN 100 million. This amount has already been fully reserved for a queue of previously submitted applications. The acceptance of applications will resume once additional funding becomes available.

A decision has been made to temporarily suspend the acceptance of new applications for the “Energodim” and “VidnovyDIM” programs

A decision has been made to introduce a temporary technical pause in accepting new applications under the “Energodim” and “VidnovyDIM” programs. Starting from April 22, 2026, the EEF has temporarily suspended the acceptance of new applications under the “Energodim” and “VudnovyDIM” programs due to the transition to a new financing model within the Ukraine Facility framework. The decision is technical in nature and is not related to a lack of funds. Application acceptance will resume after the transition is completed.

From Ruins to Revival: The Story of Resilience of the HOA 'Green House on Mechnykova' in Irpin

March 23, 2022, is forever etched in the memory of the residents of the building on Mechnykova Street in Irpin as a day of great tragedy. Six enemy 22-caliber shells directly hit the residential building. The consequences were catastrophic. Within the framework of the Energy Efficiency Fund's "VidnovyDIM" program, residents implemented the most large-scale and costly measures.

In Cherkasy, the HOA “Naddnipryanske” has comprehensively modernized a building under the “Energodim” Program, achieving energy savings of up to 50%

In Cherkasy, residents of a ten-story building constructed over 30 years ago implemented a series of energy-efficiency measures under the “Energodim” program. As a result, the building has become modern, comfortable, and energy-efficient. Energy savings amount to approximately 47–50%, which significantly reduces utility costs.

Solar energy for Troieshchyna: how an HOA ensured electricity during blackouts

In Kyiv's Troieshchyna district, the HOA "Zatyshna Oselya – 14", thanks to participation in the "GreenDIM" program, installed a solar power plant and ensured the building's energy resilience. During winter power outages, the building remained supplied with electricity and heat. The decision to invest in energy security became crucial for 132 families.
